Forecast for Friday 09 Jun 2023

Weather: Early morning mist and cloud to start, once again mainly in the east, but should readily clear by mid-morning. Staying dry with hazy sunshine as high level cloud builds from the south. There is a low risk of an isolated shower in the afternoon.

Chance of cloud-free hill tops above 600m: 40% at first (mainly in the east) rising to 95% by late morning. Dropping to 80% during the afternoon in possible showers.

Low cloud and visibility: Low cloud around 300-400m will give poor visibilities in mist and hill fog, but this will soon break during the morning to give largely cloud-free tops by midday and excellent visibility. During the afternoon possibly dipping to 800m cloud bases in heavy showers, giving moderate to poor visibility. Low cloud likely to return into the early hours of Saturday morning, giving hill fog and poor visibilities in the east.

Meteorologist's View

It will be another warm day with high UV levels so it is important to think about taking precautions such as sunglasses, caps and sunscreen, and also to take plenty of water. Although the risk of showers is small through the afternoon, the showers could be heavy giving poor visibilities and slippery surfaces. There is a chance the showers could be thundery in nature.

Forecast for Saturday 10 Jun 2023

Weather: Another warm day with hazy sunshine, after low cloud clears in the east, there is an increasing risk of heavy showers through the afternoon. The chance of seeing a shower on Saturday is greater than Friday and whilst these may be few and far between where they do occur they are likely to be thunderstorms with torrential rain and gusty winds. Outside of showers winds generally easing.

Maximum wind: East northeasterly winds 15-20mph, gusting 25-30mph easing to east southeasterly winds 9-12mph, gusting 15mph.

Chance of cloud-free hill tops 600m: 40% at first (mainly in the east) rising to 95% by late morning. Dropping to 80% during the afternoon in possible showers.

Low cloud and visibility: Low cloud around 300-400m will give poor visibilities in mist and hill fog, but this will soon break during the morning to give largely cloud-free tops by midday and excellent visibility. During the afternoon possibly dipping to 800m cloud bases in heavy showers, giving moderate to poor visibility. Low cloud likely to return into the early hours of Saturday morning, giving hill fog and poor visibilities in the east.

Temperature: **Valleys:** Plus 13 Celsius becoming plus 23 Celsius.
At 600m: Plus 10 Celsius becoming plus 19 Celsius.
Freezing level: Above all summits.
